HOK

The larger and more open the office environment, the more essential it becomes to ensure the safe and convenient storage of personal belongings. The HOK storage locker system offers exceptional flexibility, making it an ideal solution not only for modern shared workspaces but also for educational institutions, sports clubs, and other communal settings.

The product family also includes tall cabinets with spacious compartments - perfect for storing suitcases, sports gear, or other bulky items.

To enhance both security and ease of use, the lockers are available with various locking options. In addition to the traditional key lock, users can choose code locks. For added administrative convenience, master keys are available for key and combination locks.

Additional shelves can be added inside the storage cabinet as needed. Also a clothes rail can be installed between two cabinets for hanging bulkier items.

Designed to adapt to a wide range of needs, the HOK system combines functionality, security, and user-friendly technology in a sleek and modern design.
