

OMICRON

OMICRON is a folding and stackable seminar table designed for flexible and multifunctional spaces. It is ideal for environments where room layouts need to be changed frequently - such as seminar rooms, training areas, or conference halls.

Thanks to its folding mechanism, the table can be quickly collapsed, stacked, and stored on a

table trolley, making it easy to move between rooms and save space when not in use. A dedicated trolley is available as an accessory, designed to hold and transport up to 12 folded tables efficiently and securely.

OMICRON offers a practical and space-saving solution without compromising on durability or style.
