

HOK

Mida suurem ja avatum kontor, seda suurem on vajadus turvaliselt ja mugavalt isiklikke asju hoiustada. **HOK** hoiukappide süsteem on äärmiselt paindlik ning sobib ühiskasutuses olevatesse tööruumidesse ning ka koolidesse, spordiklubisse jne. Turvalisuse tõstmiseks on kappidel tavapärase võtme kõrval ka elektroonse koodi või kiibiga lukustamise võimalus, mida saab kasutada nii kapi kui ka kontoriukse avamiseks. Kapi tagaseinad saab katta helisummutavate paneelidega, kasutades neid eraldiseisvate ruumieralduse elementidena. Kappide vahele paigutatud stange on hea alternatiiv garderoobile. Mugav võimalus isiklikuks ruumiks ja asjade hoidmiseks!

Locker system **HOK** can be used for storing personal belongings in activity-based offices but also in schools, gyms etc. There are several different locking options available – classic key lock, code lock, electronic code lock or smart card lock that allows the door to be opened with the same card or chip that is used to open the office door. Using the cabinets in the middle of the room, the rear walls can be fitted with felt or fabric-covered sound attenuating panels. The hangers for clothes can also be fixed between the cabinets.

LUKU TÜÜP / LOCK TYPE

L - lihtlukk kahe võtmega
standard lock with two keys

N - mehhaaniline koodlukk
mechanical combination lock

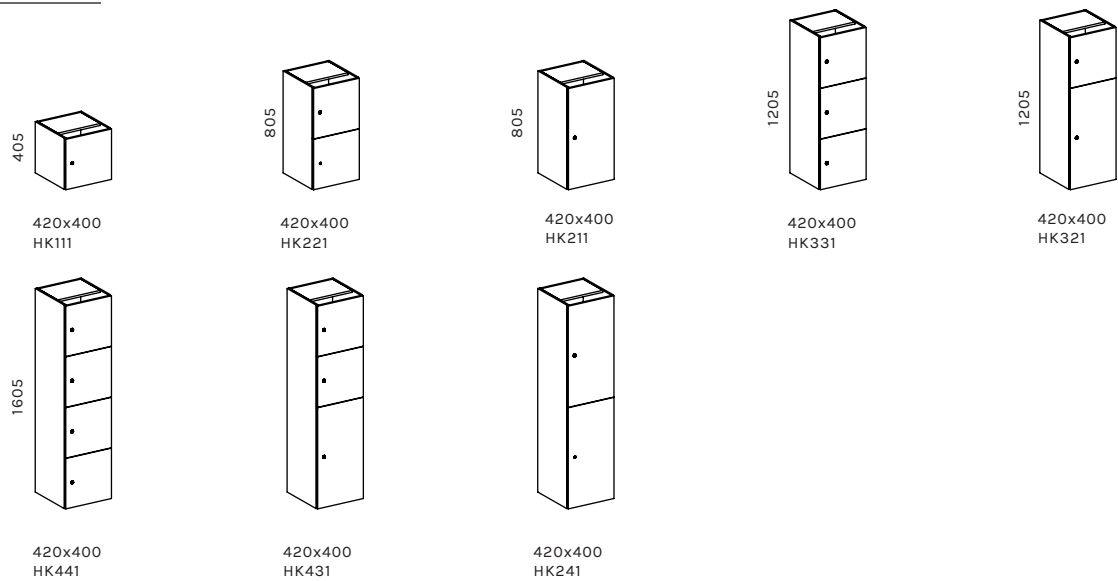

RFID lukk *
RFID lock *
CA personaalne kasutus / personal use
