

# VIPSI

The shape-inspiration of **VIPSI** chair is driven by wildlife and the desire to add value to a simple object in the form of a distinctive character. The crown of the tapered upper part of the back of the chair with a plastic plywood mould is a horn-like end-support made of solid wood.

The close-to-nature colouring, natural materials and natural flexibility of the backrest, which precludes a rigid sitting position, allow you to sit well both when working and at rest.

**VIPSI** tooli vormi-inspiratsioon töökub elusloodusest ja soovist anda lihtsavormilisele esemele lisaväärtus eristuvat karakteri näol. Plastilise vineerivormiga tooli korju kitseneva ülaosa krooniks on täispuidust voofitud sarvelaadne lõpetus-seljatoetaja.

Looduslähedane koloriit, naturalsed materjalid ja seljatoe loomulik nötkus, mis välistab jäигa isteasendi, võimaldavad hästi istuda nii tööd tehes kui puhketel.
