

VIPSI

VIPSI tooli vormi-inspiratsioon tõukub elusloodusest ja soovist anda lihtsavormilisele esemele lisaväärtus eristuva karakteri näol. Plastilise vineerivormiga tooli korju kitseneva ülaosa krooniks on täispuidust voolitud sarvelaadne lõpetus-seljatoetaja.

Looduslähedane koloriit, naturaalsed materjalid ja seljatoe loomulik nõtkus, mis võimaldab hästi istuda nii tööd tehes kui puhkehetkel.

The shape-inspiration of VIPSI chair is driven by wildlife and the desire to add value to a simple object in the form of a distinctive character. The crown of the tapered upper part of the back of the chair with a plastic plywood mould is a horn-like end-support made of solid wood.

The close-to-nature colouring, natural materials and natural flexibility of the backrest, which precludes a rigid sitting position, allow you to sit well both when working and at rest.
