SERIE

SERIE is a versatile and highly functional cabinet and shelving system, designed to integrate seamlessly with all Standard's office furniture. Its clean-lined, modular design makes it suitable for a wide range of office environments - from individual workstations to shared and collaborative spaces.

The system is built from interchangeable modules, allowing you to configure storage solutions tailored to your specific needs. Whether you require open shelves for easy access, closed cabinets for tidiness, or a combination of both - SERIE offers flexibility without compromising on style or practicality.

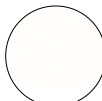

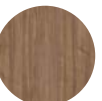

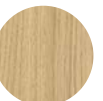

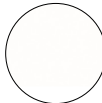

Cabinets are available with swing doors or

sliding doors, making them adaptable to different spatial layouts and user preferences. Finishes, base and handle types can be chosen to match the surrounding furniture for a unified visual appearance.

In addition, SERIE includes a variety of height and width options, enabling the creation of both low storage units (sideboards or printer cabinets) and tall shelving systems (archive or display units). The system also includes locks for storing sensitive documents or personal items.

Thanks to its timeless design and durable construction, SERIE offers long-term functionality while supporting a well-organized and aesthetically cohesive office environment.
