STANDARD

The Art of Furnishing

COLLECTION 2026

GRÜNBERG
TÖÖTUBA
WORKSHOP

80 years of furniture design & craftmanship

Standard is one of Estonia's longest-running furniture brands, crafting and selling furniture since 1944. Today, we are an international company creating high-quality furniture for modern business environments. We have our own advanced production facility and in-house engineering team.

The name, Standard, is both our benchmark and promise: a continual pursuit of quality and perfection.

We believe people perform at their best when their surroundings truly support their needs, at work and on the move. That is the environment we design, because if you have a choice, you can always choose more.

We work closely with clients and architects to create the best possible solutions. If you need specific materials or custom-made pieces that go beyond our catalogue, we are always ready to help and find the right solution together.

Sustainability & quality

We see it as our responisbility to make Standard's production and supply chain caring for the environment and truly sustainable.

We have taken several steps to reduce CO2 footprint of our operations. Over 70% of the heat used in production is generated in our sertified biomass boiler, using our own production residues. This significantly reduces the use of fossil fuels and supports circular economy principles.

Our FSC licences cover both FSC Mix nad FSC 100% categories, underscoring our *commitment to responsible sourcing and sustainable forestry.

The electricity used in our factory comes from renewable sources - wind and solar parks located in Estonia. At the same time, we are actively working on material innovation to introduce more recyclable materials to the market.

CONNECT

CONNECT

CONNECT is a series of innovative office furniture designed to support meaningful collaboration in modern work environments. With its clean, minimalist aesthetic, the collection is ideal for a variety of public and shared spaces.

A broad selection of colors allows for seamless integration into any interior, while the acoustic screen helps reduce ambient noise, creating a more focused and comfortable atmosphere.

Whether in a contemporary office, an open-plan workspace, or a library, the CONNECT series enhances the environment with both functionality and visual appeal.

CONNECT

The CONNECT chair is a versatile seating solution designed for both focused individual work and quick meetings with a colleague. It combines acoustic comfort with a range of smart, practical features. The chair is available in two versions: a swivel base for added flexibility and an armchair with a fixed base for more stable setups.

One of its standout features is the integrated folding table, which provides a convenient surface for working or holding informal discussions whenever needed. Additionally, the chair includes a built-in charging port, ensuring your devices stay charged and ready throughout the day.

With a wide selection of colors, the CONNECT chair can be seamlessly integrated into any environment - whether it's a modern office, open-plan workspace, or library. It enhances the setting not only with its functionality, but also with its clean, contemporary design.

CONNECT

The CONNECT standing conference table is a smart and stylish solution for quick meetings, combining modern design with practical functionality.

It can be ordered with an integrated display, enabling easy and effective information exchange. The table is also equipped with power and USB outlets, ensuring convenient connectivity for laptops, smartphones, and tablets.

Available in a wide range of colours, the CONNECT table can be tailored to match the interior design and style preferences of any space. This flexibility allows for the creation of a cohesive and professional environment, where meetings can be both productive and comfortable.

Additionally, the extensive colour options make it easy to align the table with your brand identity or overall design concept - enhancing both visual appeal and workplace harmony.

CONNECT

The CONNECT meeting pod is an ideal solution for quick discussions, brainstorming sessions, and focused meetings in a modern office environment. Designed for dynamic teamwork, it provides a dedicated space within open-plan offices, ensuring both privacy and concentration for participants.

Due to its compact and flexible design, the pod fits seamlessly into various workplace layouts, supporting productive collaboration without external distractions. Integrated features such as power and USB outlets, optional screens, and acoustic insulation makes the CONNECT meeting pod a practical and comfortable choice for uninterrupted communication.

A wide range of colours allows the pod to be easily matched with any interior design style, enhancing both the functionality and visual appeal of the workspace.

CONNECT

The CONNECT sofa features a modern, minimalist design tailored for public and shared spaces. With a wide selection of colours, it can be easily adapted to suit any interior - be it a contemporary office, open-plan workspace, or a library. CONNECT offers not just functionality, but also elevates the aesthetic appeal of any environment.

Its nest-like form helps to reduce ambient noise, creating a comfortable setting for focused work, private conversations, or casual coffee breaks. The CONNECT sofa is available with both low and high screens, offering varying levels of privacy and acoustic comfort.

ART & MART

Inspired by nature, both the ART and mART desks feature carefully selected materials and colors. The tabletop is crafted from high-quality birch plywood, with the exposed edge detailing highlighting the natural layered structure that runs along the perimeter. The surface is finished with soft-touch, human-friendly desktop linoleum for a pleasant and durable work experience.

The zoomorphic geometry of the ART desk's leg frame, also made from birch plywood, draws inspiration from Jaan Koort's sculpture "Wild Goat", lending the desk a sculptural and organic character.

The mART version features an eco-conscious PVC-free leg frame, while Linak Zero technology ensures that power consumption stays below 0.1 W in standby mode, helping to reduce CO emissions and promote energy efficiency.

CRATE EL

The CRATE EL is an electric height-adjustable office desk, available with one or three workplaces. Its rounded shape and distinctive design offer a refreshing alternative to conventional square-edged desks.

The T-leg electric frame allows easy height adjustment from 610 to 1260 mm through a convenient remote control mounted to the desk. Sit-stand functionality encourages movement and posture variation, helping to reduce strain and promote overall well-being during extended work periods.

For added flexibility, cable access holes can be positioned on the tabletop, making it easy to integrate power and data connections directly into the work surface.

Drawer units on wheels, side cabinets, and other elements from the PIANO and SERIE product families complement CRATE desks perfectly. You can also enhance your CRATE desk with PIANO front panels and acoustic partitions from the SOFT or MUTEK collections.

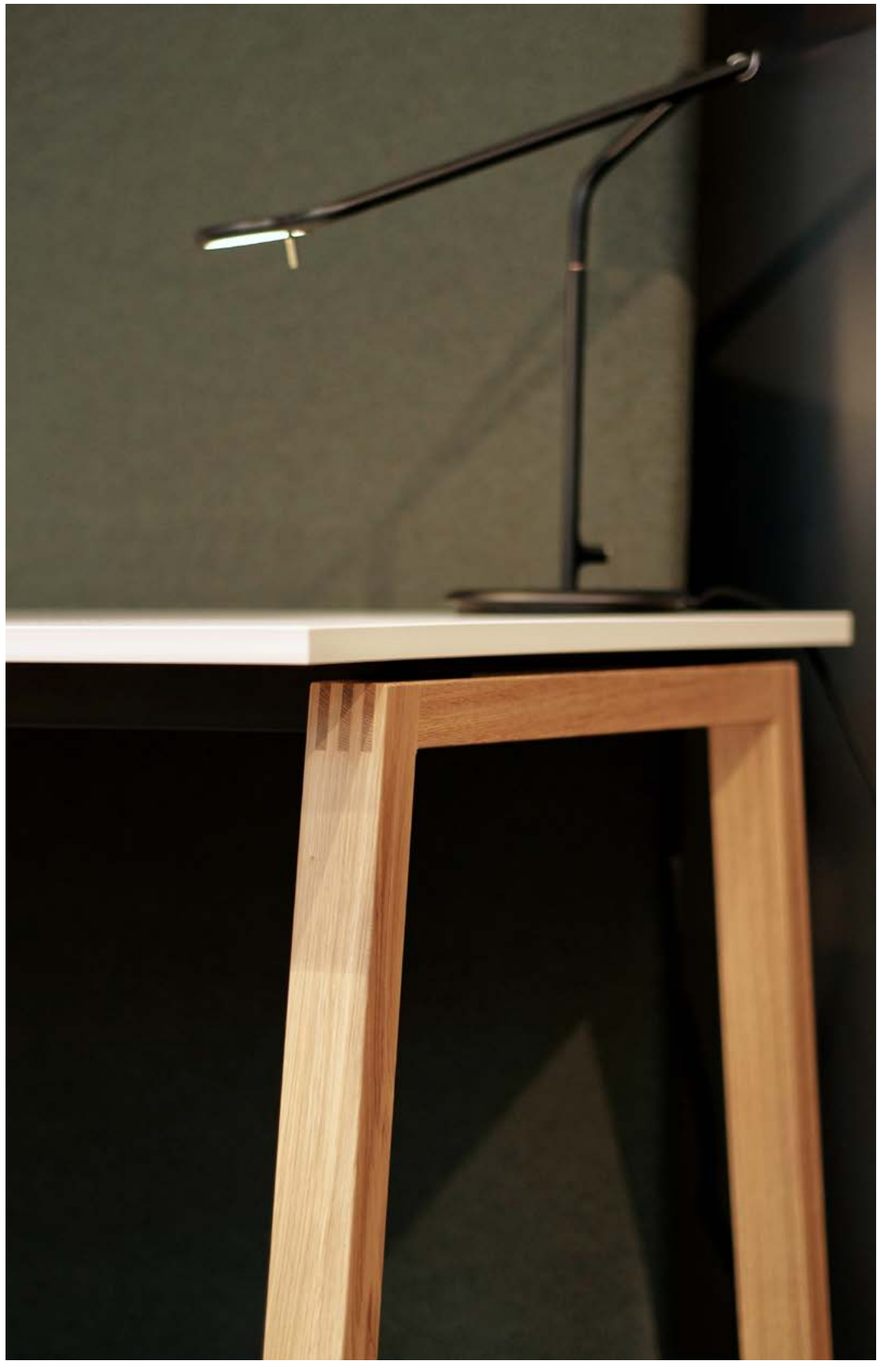
PIANO



PIANO WOOD

PIANO WOOD is an office desk with an elegant design that brings warmth and character to any space. A distinctive wooden dowel detail adds a homely touch, creating a comfortable atmosphere ideal for both traditional offices and home workspaces. The minimalist, single-tone tabletop pairs beautifully with natural solid oak, blending sophistication with natural warmth.

The solid oak leg frame enhances the desk's uniqueness while providing excellent stability and durability. Crafted from high-quality materials, the desk promises timeless quality and lasting performance.

Available in three fixed sizes, the desk can also be customized with a cable hole positioned on the tabletop to accommodate power and network connections seamlessly.

Drawer units on wheels, side cabinets, and other elements from the PIANO and SERIE product families complement PIANO WOOD desks perfectly. You can also enhance your office desk with front panels from the same series as well as acoustic partitions from the SOFT or MUTEK collections.

LITE

High-quality electric office desk with an excellent price-to-quality ratio. Designed to meet modern ergonomic standards, it is ideal for those who work at a computer all day - whether in the office or a home office.

LITE and LITE MINI desks feature dual motors integrated into both leg frames, ensuring fast, smooth, and quiet height adjustment. The desk height is easily adjustable via a user-friendly control button.

A cable hole can be added to the right, left, or center of the desktop to support a variety of functional needs - such as providing easy access to electricity and network connections directly on the work surface.

Drawer units on wheels, side cabinets, and other elements from the PIANO and SERIE product families complement PIANO desks perfectly. You can also enhance your LITE desk with front panels from the PIANO series as well as acoustic partitions from the SOFT or MUTEK collections.

SOFT

SOFT desk and floor screens are an effective and visually appealing solution for reducing noise pollution in open-plan offices. They function both as sound absorbers and as space dividers, helping to create a more focused and comfortable working environment. In addition to their acoustic benefits, the screens also serve as interior design elements, adding texture, color, and structure to the office layout.

This is a simple yet practical way to reduce background noise and distractions as well as enhance privacy between workstations. The SOFT product line offers a wide range of sizes and mounting solutions - from screens that attach directly to desks to freestanding floor panels that can be positioned wherever needed.

Acoustic screens are ideal for open offices, shared workspaces, meeting areas, and breakout zones where sound control and spatial separation are important. They help to improve overall concentration and well-being by creating calmer, more organized work areas within a busy environment.

MUTEK

MUTEK desk screen reduces noise pollution in open offices, acting as a room divider and is also an interior design element with a hiding function. The selection of screens includes both a square and a round corner versions. Both are available in three sizes, which have various combination possibilities as both front and side screens.

In addition, the spring clips allow changing the placement of the screens and adjusting the heights every millimeter without damaging the surface of the screen. There is an adjustable gap between the screen and the tabletop, which allows to pass the wires under the table over the edge of the table. The tabletop or metal frame to which the screen is attached can have a wide thickness range (13-52 mm).

The screens are finished with A-class certified PET felt, whose composition is 60% recycled at a minimum. Felt is available in four colors - grey, black, beige and greenish grey. The screens come with a mounting kit.

PIANO

The PIANO melamine front screen is a minimalist and practical solution for dividing space in modern office environments. It functions as a modesty panel and a visual barrier, offering employees greater privacy and focus in open-plan settings. In addition to its functional role, the screen also serves as a clean-lined interior design element that complements contemporary workspaces.

The front panel is made of durable melamine-coated board, which is easy to maintain and resistant to everyday wear. It is available in eight stylish color finishes, allowing it to be matched with various desk styles and office interiors.

Each screen comes with a set of sturdy metal L-brackets for secure attachment to the desk. The brackets ensure a stable installation while maintaining a sleek and discreet appearance.

The PIANO front screen is ideal for use in both private offices and open workstations where visual separation and tidiness are desired. It helps define individual work zones, improves aesthetics, and contributes to a more organized and professional-looking office layout.

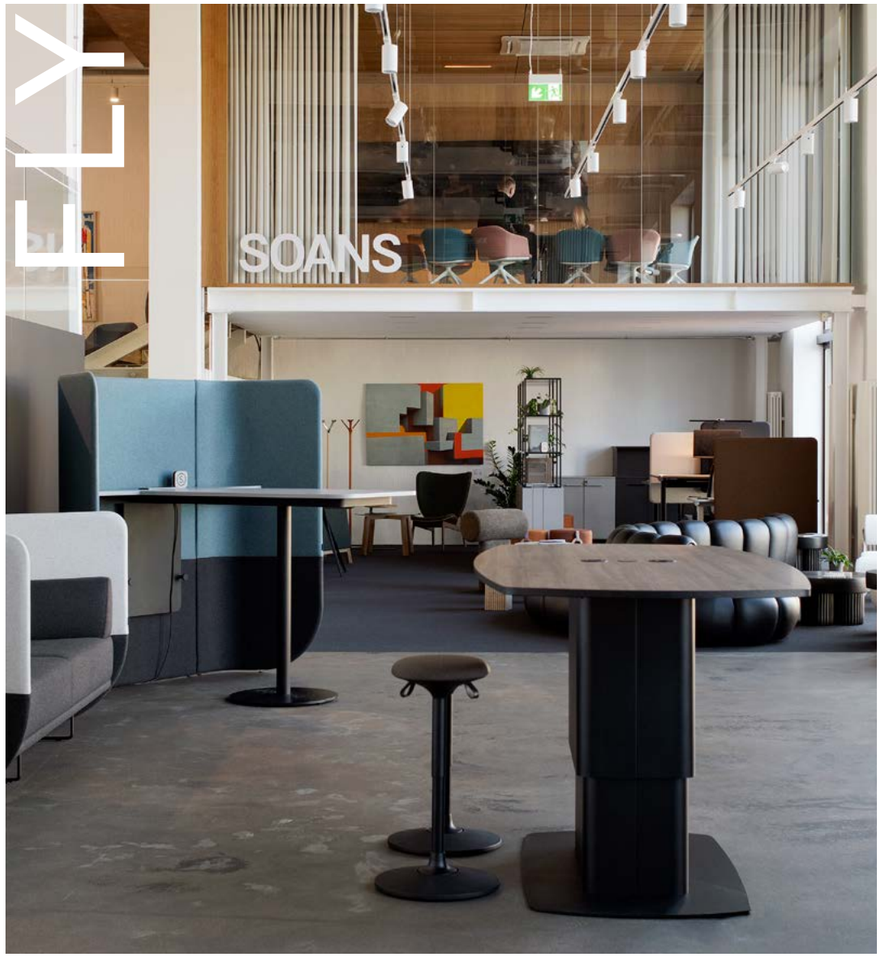
Meeting Spaces



FLY

FLY is a stylish meeting table with clean and modern lines that bring freshness and innovation to any space. More than just a table, FLY is a statement piece - a dynamic design element that redefines traditional meeting culture.

Its standing-height format encourages movement and energy, offering participants the chance to stretch and stay alert even during longer discussions. This promotes better posture, improved focus, and a more engaging meeting experience. The electric leg frame is PVC-free. Linak Zero technology keeps power consumption under 0.1 W on standby mode, thus minimizing CO2 emissions.

Available in a wide range of color options, FLY can be easily adapted to match any interior style - from bold and creative to minimalist and professional.

SUSTAINABLE CHOICE

Our eletric frames are fully PVC-free and LINAK ZERO technology keeps standby power consumption as low as <0.1W – reducing CO_2 emissions to an absolute minimum.

ANTI-COLLISION SENSOR

Anti-collision sensors stop the movement of desk to prevent damage to people or objects.

KOKO

KOKO is a stylish table that brings natural warmth and timeless elegance to any space. The legs are crafted from solid oak, and the unique grain and texture of the wood make each table one of a kind. The natural finish highlights the character of the material, adding a sense of authenticity and craftsmanship to the interior.

Versatile in function, the KOKO table is equally well-suited for use as a meeting table or a dining table. The collection includes both rectangular and round versions, available in standard sitting height as well as in a modern standing height format - offering flexibility for different environments and needs.

For added functionality, the tabletop can be equipped with built-in sockets for power and multimedia connections, supporting today's hybrid and tech-enabled workspaces.

FALDA

FALDA is a stylish and lightweight folding seminar table, ideal for multifunctional spaces that require frequent reconfiguration. Its practical folding mechanism allows the table to be quickly and easily folded, stored on a trolley, and moved from one room to another as needed.

A version with castors is also available, making it easy for a single person to relocate the table effortlessly. For added convenience, a table trolley is offered as an accessory, capable of transporting and storing up to 12 folded tables at once - making the setup and storage more efficient and organized.

Whether for seminars, training sessions, events, or temporary workspaces, FALDA offers a flexible, space-saving solution without compromising on style.

Storage & Space Dividers

PIANO

The PIANO product family offers a cohesive and versatile range of office furniture designed to create well-functioning and aesthetically unified workspaces. Its clean lines and minimalist style makes it easy to combine with various interior styles, while its practical features support everyday work routines.

PIANO storage units are fully compatible with work desks from the CRATE, PIANO, and LITE series, as well as cupboards and shelves from the SERIE storage range - enabling the creation of integrated and flexible workspace solutions.

PIANO drawer box series which is available with one or three drawer units, is a spacious and practical storage solution that suits both standard and electric height-adjustable desks. The box is equipped with castors for easy mobility and comes with drawers that feature either metal or plastic sides. For added organization, a removable pencil tray can be included.

PIANO side cabinet on wheels offers generous storage while also functioning as an additional utility surface or compact cabinet. It pairs seamlessly with both standard and sit-stand desks. The cabinet is great solution for frequently used items which need easy access.

SERIE

SERIE is a versatile and highly functional cabinet and shelving system, designed to integrate seamlessly with all Standard's office furniture. Its clean-lined, modular design makes it suitable for a wide range of office environments - from individual workstations to shared and collaborative spaces.

The system is built from interchangeable modules, allowing you to configure storage solutions tailored to your specific needs. Whether you require open shelves for easy access, closed cabinets for tidiness, or a combination of both - SERIE offers flexibility without compromising on style or practicality.

Cabinets are available with swing doors or sliding doors, making them adaptable to different spatial layouts and user preferences. Finishes, base and handle types can be chosen to match the surrounding furniture for a unified visual appearance.

In addition, SERIE includes a variety of height and width options, enabling the creation of both low storage units (sideboards or printer cabinets) and tall shelving systems (archive or display units). The system also includes locks for storing sensitive documents or personal items.

Thanks to ita timeless design and durable construction, SERIE offers long-term functionality while supporting a well-organized and aesthetically cohesive office environment.

ENDLESS

ENDLESS is a remarkable smart room divider that redefines traditional storage and space division in modern work environments. Developed by Standard, this multifunctional container system combines the practicality of a cabinet with the flexibility and visual appeal of a contemporary interior element - making it a true statement piece in any office layout.

Unlike ordinary storage units, ENDLESS breaks the monotony with its modular and customizable design, allowing users to create unique combinations that reflect their specific functional needs and aesthetic preferences. Whether used as a space divider, a storage unit, or even a visual accent, ENDLESS offers nearly limitless possibilities.

The modular system allows various elements to be stacked or arranged side by side, enabling the creation of dynamic layouts - from low, open consoles to tall, semi-transparent partitions. Modules can include open shelves, closed cabinets, or display niches, offering both storage and zoning functionalities.

ENDLESS is ideal for open-plan offices where it's important to balance collaboration with privacy. It helps structure the space while maintaining a sense of openness, and its sleek design ensures that the divider itself becomes an integral part of the interior concept - not just a functional necessity.

With ENDLESS, your workspace evolves with your needs - intelligently, beautifully, and without limits.

HOK

The larger and more open the office environment, the more essential it becomes to ensure the safe and convenient storage of personal belongings. The HOK storage locker system offers exceptional flexibility, making it an ideal solution not only for modern shared workspaces but also for educational institutions, sports clubs, and other communal settings.

The product family also includes tall cabinets with spacious compartments - perfect for storing suitcases, sports gear, or other bulky items.

To enhance both security and ease of use, the lockers are available with various locking options. In addition to the traditional key lock, users can choose code locks. For added administrative convenience, master keys are available for key and combination locks.

Additional shelves can be added inside the storage cabinet as needed. Also a clothes rail can be installed between two cabinets for hanging bulkier items.

Designed to adapt to a wide range of needs, the HOK system combines functionality, security, and user-friendly technology in a sleek and modern design.

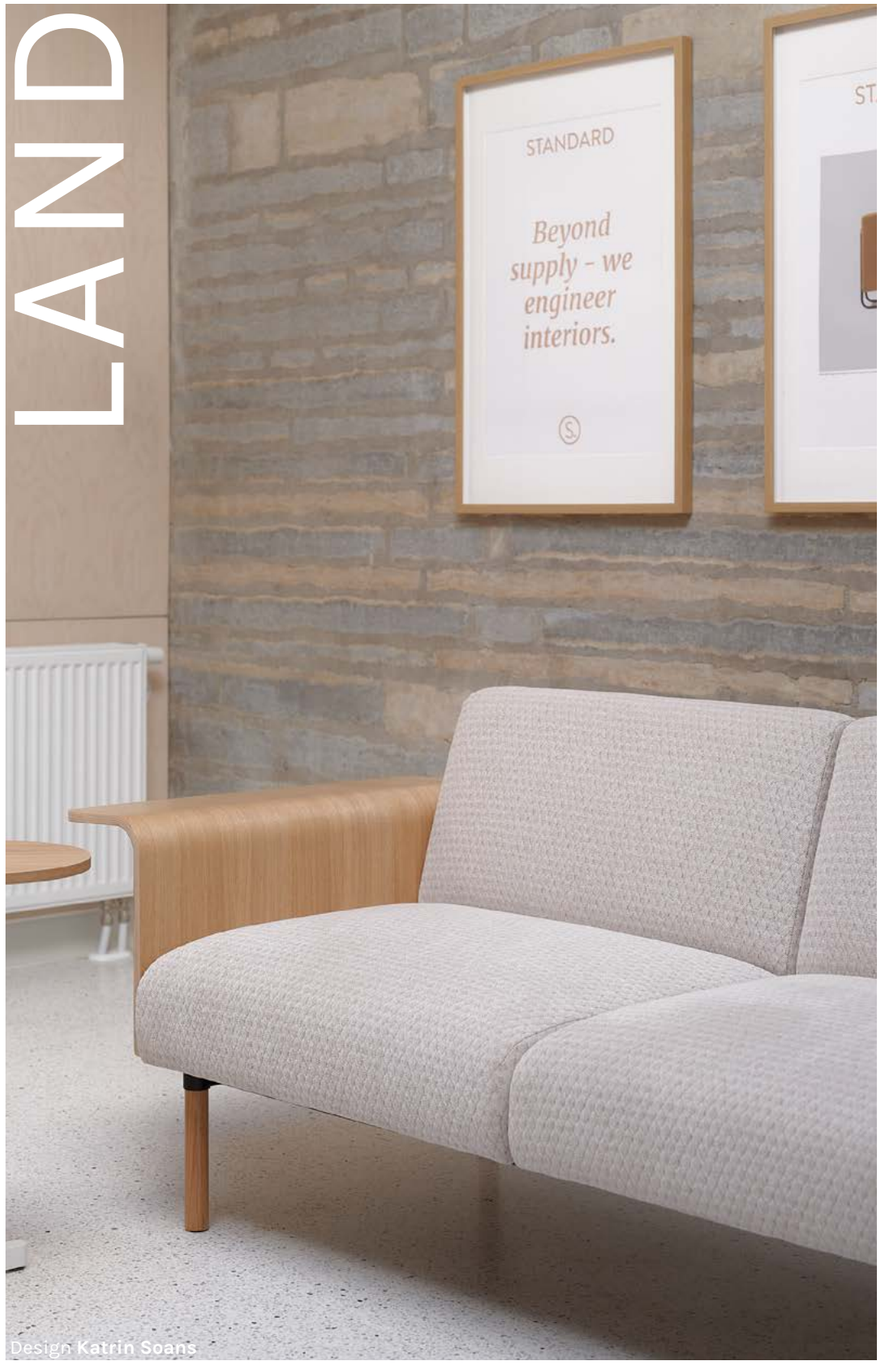
Waiting & Lounge Areas



Design **Katrin Soans**

LAND

The modular LAND collection, including armchairs, sofas, and benches with a timeless design, offers a refined and inviting solution for enhancing the comfort and atmosphere of public spaces.

Thanks to its versatile modular system, it is easy to configure a layout that harmonizes perfectly with the surrounding environment. Whether you need a compact seating nook or a more expansive lounge area, the LAND collection allows for endless combinations to suit a wide variety of interiors and purposes. The thoughtfully designed modules can be arranged to create both striking focal points and seamless, space-efficient seating solutions.

Beyond its elegant appearance, the LAND modular system is also exceptionally comfortable, making it ideal for long-term use in lobbies, waiting areas, or collaborative zones.

Each piece in the collection can be upholstered in a wide selection of high-quality fabrics, offering numerous options in color, texture, and durability to match aesthetic preferences and functional requirements.

ZEETA

The ZEETA collection offers a comprehensive range of armchair, sofa, and bench modules, characterized by their clean lines and minimalist design. With its highly flexible modular system, ZEETA makes it easy to create countless configurations - whether you're furnishing compact reception corners or expansive waiting areas.

For added functionality, power sockets for laptops and mobile devices can be seamlessly integrated into any seating module, enhancing user convenience in public or semi-public spaces.

Complementing the seating elements is a diverse selection of sofa tables, available in various sizes, shapes, and materials. This allows for cohesive and customized interior solutions that meet both aesthetic and practical needs.

ZEETA products can be upholstered in a wide range of fabrics or high-quality artificial leather, offering ample opportunities to match branding or design schemes. Incorporating two-tone upholstery, combining shades or textures, introduces a touch of personality and visual richness that beautifully accentuates the chair's unique character.

FRANK

With its clean lines and timeless aesthetic, the FRANK collection is an ideal choice for furnishing public and semi-public spaces, such as lobbies, lounges, and reception areas. Designed to balance visual simplicity with refined details, FRANK brings a sense of calm sophistication to any interior.

The armchair and compact sofa feature leg frame crafted from natural oak, showcasing a beautifully executed dowel joint that not only reinforces the structure but also highlights the craftsmanship and quality of the design. For a more contemporary look, the collection is also available with elegantly shaped metal leg frame, offering a sleek alternative that complements modern interiors.

All FRANK models can be upholstered in a wide selection of high-quality fabrics or artificial leather, allowing for easy customization to suit various design concepts and functional needs.

BLISS

With its modern silhouette and timeless elegance, the BLISS collection seamlessly integrates into a wide variety of interiors - be it an office, lounge, reception area, or collaborative workspace.

Designed for both comfort and visual appeal, BLISS features an inviting seat and gently supportive armrests, making it a perfect choice for relaxed sitting, focused work, or extended meetings.

To create a unified and refined atmosphere, pair the armchair with a matching sofa from the same series. This combination not only enhances the aesthetic harmony of the space but also increases its comfort and functionality.

BLISS can be upholstered in a wide array of premium materials, including an extensive selection of fabrics, artificial leather, or natural leather, allowing for tailored solutions that meet both design preferences and practical requirements.

HUUGO

The HUUGO armchair and sofa feature a classic silhouette and minimalist design, bringing a touch of understated elegance and refined functionality to any interior. Their clean lines and balanced proportions make them a versatile choice for a variety of settings - from lobbies and waiting areas to open-plan office spaces and executive lounges.

Thanks to their timeless aesthetic, HUUGO pieces blend seamlessly into both contemporary and more traditional environments, offering comfort without compromising on style.

All products in the HUUGO collection can be upholstered in a wide selection of materials, including high-quality fabrics, artificial leather, and natural leather, allowing for customization that aligns with both visual and practical requirements.

Original design
Maile Grünberg & Juta Lember

RETRO 1973

Standard proudly reintroduces one of the most iconic pieces in Estonian design history - the 1973 lounge chair, originally created by renowned designers Maile Grünberg and Juta Lember. This reissued classic combines the bold color palette, organic shapes, and free spirit characteristic of the 1970s.

The lounge chair's construction is based on bent steel tubing, giving it a light and elegant appearance, while the upholstered, curved plywood seat ensures both comfort and durability. Staying true to the spirit of the original, the collection features retro-inspired colors and finishes that add unique character to any interior.

This is more than just a piece of furniture - it's a story of design heritage, bringing the freedom and coziness of the 1970s into today's living spaces.

Perfect for homes, hotels, and modern office spaces.

NAP

A charming and distinctive pouf that brings character and warmth to any interior. Thanks to its customizable upholstery, this eye-catching piece allows you to express personal style and tailor the look to perfectly suit its surroundings. Whether placed in a living area, lounge, office, or reception space, the pouf adds both visual appeal and cozy functionality.

The pouf is fitted with a natural oak wood handle, adding a touch of craftsmanship and making it even more practical. The handle loop fabric can be matched to the main upholstery for a cohesive and polished look. Weighing just 2.3 kg, the pouf is lightweight and easy to move, making it a flexible addition to dynamic environments.

The product can be upholstered in a wide range of fabrics, offering endless combinations in color, texture, and feel, ensuring a perfect match for any room or interior concept.

ZEETA TABLE

ZEETA coffee tables, available in a variety of shapes and sizes, are designed to complement several of Standard's soft seating collections, bringing a sense of cohesion, elegance, and contemporary style to any interior. Their versatile design makes them an ideal choice for lounges, waiting areas, meeting spaces, and more.

The tabletops can be finished in any of Standard's melamine options, allowing for seamless coordination with other furniture pieces. For a more refined or modern look, the ZEETA tables are also available with glass surfaces-either clear or smoked/darkened, depending on the desired atmosphere.

The sturdy metal frame is finished with high-quality powder coating and comes in three classic color options: black, white, or silver grey, ensuring durability and visual harmony with a wide range of interiors.

VIPSI

Design **Eero Jürgenson**

VIPSI

At the heart of the VIPSI chair's design is a distinctive horn-like backrest - a sculptural back support crafted from solid wood, crowning the tapered plywood top. This elegant detail not only adds character but also serves a functional purpose: the naturally flexible backrest gently follows the user's posture, promoting comfort and movement while preventing a rigid sitting position. Whether used for focused work or relaxed seating, VIPSI supports both with equal ease.

The chair's organic form is inspired by wildlife, reflecting a design philosophy that elevates a simple everyday object into something expressive and memorable. Its natural materials and earth-toned color palette further enhance this connection to nature, creating a calm yet distinctive presence in any environment. VIPSI is designed to be comfortable, but never boring.

In addition to its visual appeal and ergonomic comfort, VIPSI is also practically designed - the chair is easily stackable, making it ideal for flexible spaces. A dedicated chair trolley is available and can accommodate up to 10 chairs for convenient storage and transport.
